

## Why do you need Window Washer?

A PC Magazine Editors' Choice award winner, Window Washer 6.0 improves PC performance in just minutes by cleaning out system clutter and maintains privacy by completely washing away traces of your PC activities. Recommended by privacy advocates, Window Washer cleans hundreds of popular programs like Adobe Photoshop, Microsoft Word and Paint Shop Pro along with a number of operating system areas. Window Washer scours away traces of Internet activity in your favorite browser, such as Internet Explorer, AOL and Firefox, among others.

Window Washer allows you to keep what you do on your computer your business. If you're not careful, your online activities can be traced through Internet browser history, cache and cookies. Even when you aren't online, operating system and software applications keep track of your accessed files. These unnecessary files compromise your privacy and slow down your computer. Window Washer also keeps your system running smoothly by clearing out excess files to unclog your system and recover space on your hard drive, sometimes hundreds of Megabytes of old, unwanted data..

*Easy to use, Window Washer lets you start a wash directly from the "Home" screen.*

## What makes Window Washer the leading system cleaner available?

For more than eight years, Window Washer has helped millions of consumers wipe away online and offline tracks for complete privacy and improved PC performance.

With Window Washer, you can:

- Remove useless files that clog your hard drive and slow down your PC for improved performance
- Eliminate online and offline tracks for complete privacy
- Use the bleach function to completely wipe out unnecessary data
- Clean hundreds of popular programs like Adobe Acrobat, iTunes and QuickTime

## New in Window Washer 6.0

- Comprehensively cleans more browsers than before, including Mozilla and Firefox
- Scrubs hundreds of the popular programs, including the latest versions of Adobe Acrobat and iTunes
- Free space cleaner to open up more of your PC's resources
- Total system erase for easy hard drive reformatting

## Webroot Window Washer Key Features

### Extensive Wash Areas

Window Washer scours hundreds of areas on your PC to remove useless files to ensure your privacy and free up valuable disk space.

### Internet Browser Activity Eraser

Window Washer cleans all facets of your Internet browser activity, including Internet history, address bar, cache, cookies and more. Mozilla and Firefox users now benefit from the same online privacy protection that users of Internet Explorer, AOL and Netscape already enjoy.

### Permanent “Bleaching” of Files

For complete privacy, use the bleach function. Bleach, an encryption feature, fully overwrites files with random characters to make them unrecoverable by third-party recovery programs. This powerful feature exceeds the tough standards of the Department of Defense and the National Security Agency.

### One-Click Shredder

Use the shredder function to easily and conveniently delete a folder and all of its contents, or just a single file, in one step. A simple right-click will permanently overwrite these files, making them unrecoverable.

### Free Space Cleaner

Your computer’s free space contains portions of old and previously deleted files and documents. Window Washer cleans this area, rendering the files you deleted earlier permanently unrecoverable.

### Critical File Protection

Window Washer includes built-in safety features to prevent the accidental removal of important files. Alerts requests confirmation of your request to delete special folders, like system folders, My Documents, My Photos and others, so they remain safe from inadvertent removal.

### Smart Cookie Saver

Window Washer erases the cookies you don’t want and lets you keep and save those you do. That way you maintain your preferred Internet settings and log-ins for all your favorite Web sites.

### Personalized Washes

During a wash, Window Washer automatically cleans your favorite programs such as Real Player, Google Search Toolbar, iTunes, Macromedia Flash Player, Adobe Acrobat and hundreds more, to keep these programs running smoothly.

### Automatic Wash Cycles

You can set Window Washer to automatically clean your system at specified intervals, like when you shut down your computer. For added security, Webroot recommends setting Window Washer to wash when you close your Internet browser. A wash takes just minutes to perform.

### Total System Erase

For complete privacy protection, Window Washer can completely erase your hard drive, files, programs and operating system for easy re-formatting. Consider using this unique feature if you’re donating or selling your PC and don’t want your files to be seen by strangers.

### Expert Customer Support

Webroot Window Washer is backed by knowledgeable and friendly customer support technicians to help you through any issues you encounter. Unlike many of our competitors, we offer this service for free.

### On the Record...

*“Window Washer 6.0 handles more third party applications than all the others put together...” -PC Magazine*

*“One of the best features of Window Washer is its ability to work with third-party software...to delete unwanted files, folders and registry entries created by other applications on your computer.” -PC Info*

*“Window Washer is a genuinely useful computer cleaner that can help keep your machine lean and mean....” - Web User*

*“Used alongside Webroot Spy Sweeper, Window Washer provides an almost perfect privacy package.” - PC Pro*
